Observation Sheet

For Scenarios A, B and C. Use one sheet per observer and session (the same sheet for all scenarios keeps the data comparable)

Walk through the groups about every 10 minutes and stay 2 to 3 minutes with each group. Write each observation in the row of the matching dimension, with the minute of the round and the group number. Describe what you see or hear, not a judgment. The facilitator guide of each scenario lists the signs to look for. Use the same rules in both rounds.

Scenario (A, B or C)	Date	Hardware or TinkerCad	Number of groups

Groups and roles

Note who took on which role according to the task sheet. Note any change of role in Round 2.

Group	Team size	Roles	Changes in Round 2
1			
2			
3			
4			
5			
6			

Round 1

Dimension	What to look for	Group	Observed sign
D1 Role clarity	Who does what. Open tasks. People without a task or outside their role.		
D2 Communication structure	Who talks to whom, through whom and at which points.		
D3 Coordination quality	Alignment, duplicated work, idle time, waiting.		
D4 Fault diagnosis and iteration	How the team searches a fault. Global or local. Who fixes it.		
D5 Resource and time management	Time checks, planning, use of the phases, end phase.		

Dimension	What to look for	Group	Observed sign

Round 2

Dimension	What to look for	Group	Observed sign
D1 Role clarity	Who does what. Open tasks. People without a task or outside their role.		
D2 Communication structure	Who talks to whom, through whom and at which points.		
D3 Coordination quality	Alignment, duplicated work, idle time, waiting.		
D4 Fault diagnosis and iteration	How the team searches a fault. Global or local. Who fixes it.		
D5 Resource and time management	Time checks, planning, use of the phases, end phase.		

Dimension	What to look for	Group	Observed sign

Fault finding

Fault codes are A1, B1 and C1 to C3 as listed in the facilitator guides. In a global search the team reads or changes the whole program or several parts at once. In a local search one person goes to one station, function or module

Round	Group	Fault	Found by (role)	Fixed by (role)	Global or local	How found and notes

Interventions

Step in only for safety or for a hard technical blocker that is not part of the task. Note every intervention.

Round	Group	Reason (safety or technical blocker)	What you said or did

Other remarks on the session

Debriefing notes

The note taker fills in this part during the debriefing. Write key statements and the group that made them, in the students' own words where possible.

Topic	Notes (statement and group)
1. What happened	
2. Comparison of rounds, D1 Role clarity	
2. Comparison of rounds, D2 Communication structure	
2. Comparison of rounds, D3 Coordination quality	
2. Comparison of rounds, D4 Fault diagnosis and iteration	
2. Comparison of rounds, D5 Resource and time management	
3. The organizational mechanism	
4. Transfer to real organizations
